

Caring For Your Aging Aircraft

It's no secret that our aircraft are getting on in years, and have special issues. As owner/operators, maintenance technicians, or even pilots, it's important to know what those issues are and how to properly deal with them to keep them flying in their golden years.

Louis McGraw is an expert in detecting and correcting corrosion in these aging aircraft, and will share with us some of the things he's seen and that you need to look out for, to keep your aircraft in top condition for safe flight and last many more years.

Meeting room is the main maintenance hangar at Fullerton Flight Center (formerly Aviation Facilities, Inc (AFI)), which is the building west of the main terminal building at the airport.
