

Flying in Alaska and What It Can Teach Us

CFII Jason Miller and Alaska pilot Deon Mitton will present:

The importance of training beyond the ACS. Learning the edges of the envelope is how Alaska pilots “graduate” their first season and continue to operate safely in a very challenging environment. This talk is about what we can learn from that approach and what skills we can practice to improve here in the lower 48.

Loss of Control Will be a major theme of the evening. What pilots can do beyond the training they get in the ACS to better prepare to include:

- Stall Exercises
- Coordination Rolls
- Landings
- Personal minimums
