

CFI Jason Miller Talks With Expedition Physician Howard Donner MD About Surviving Forced Landings

Event Details

Studies show that even with the best contingency planning, flight plans, and personal locator beacons, most off-airport landings require 24-36 hours out before rescue. This talk discusses a recent forced landing event and how contingency planning played a big role in the successful outcome.

The webinar is a free online event. There are unlimited seats available. Please click below to register.
