

Oceanic Flights - the Differences and Surprises with Jim Barry

For our June EAA Chapter 92 meeting, join us as we journey through a career of oceanic and international flying that started before satellites and ended with incredible technological advances of the space age. Advances in navigation, communications, flight planning and weather information will be discussed from the 1970s to present. We will discuss how techniques used over water can assist in VFR flying over land and bodies of water. A few of the inevitable surprises that are always challenging will be presented as well.

It is located on Sand Canyon Avenue between the 5 and 405 at the corner of Sand Canyon and Waterworks Way. Turn LEFT after entering parking lot from Sand Canyon. If entering from Waterworks Way, then continue through parking lot to SECOND building. Follow signs to Community Conference Room in 15500 Sand Canyon building. This event will last approximately 1.5 hours.
