

Sudden and Not So Sudden Pilot Incapacitation

Learn how to perform an advanced preflight on you, the pilot as well as set up preventative maintenance of the pilot. Know warning signs of impending physiologic/medical issues that can impact safe and effective pilot performance. Pilots "self certify" their medical fitness on each flight-know how to effectively do this.

Directions: Park in airport terminal lot. Held in restaurant meeting room.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
