Representative Alex Mirabile

:
This event will cover the current status of the integration of unmanned aircraft systems (UAS) in the national airspace system.

The FAA's UAS Integration Office (AFS-80) is the Agency's single point of contact for everything UAS. It was established in 2013 with a vision for safe, timely, and efficient integration of UAS into the National Airspace System (NAS). The UAS Integration Office collaboratively develops operating concepts, policies, requirements, criteria, and procedures for new system evaluations, integration, and implementation of emerging UAS technologies. It is the sponsoring office for all FAA UAS Research and Development initiatives, and coordinates all UAS operational authorizations, including Certificate of Waiver or Authorizations (COAs) and Section 333 exemptions

Directions: Simulation Room next to the main entrance

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
