

FAASTeam presents:

Loss of Control and The Impossible Turn

Respected aviation experts will discuss Loss of Control accidents and offer advice on how to hone your skills and sharpen your judgment to get more utility, safety, and fun from your flying. There will be plenty of opportunity to ask questions and participate in the discussion. Loss of Aircraft Control continues to be the number one concern of the NTSB and the FAA. We will discuss the leading causes of Loss Of Control using accidents within the takeoff and landing phase that have occurred within Arizona. Coupled with the presentation is a discussion on the odds of completing "The impossible Turn", the fatal urge for pilots to turn back to their departure airport should they experience an engine failure on the upwind leg. This is an audio and video presentation of actual aircraft incidents.

Directions: Fire Department #3 is located just to the east of the self serve fuel pumps. Fly-in attendees can walk to the training facility while those driving can park outside the fence around the buildings and walk to the classroom.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
