

FAA Safety Team presents:

VMC Club Meeting - Mastering the Art of Aviation

Dr. Steinmetz will present the basics of flying gliders for power pilots: aerodynamics and controls, soaring and cross-country flying, glider types, how to add a rating, and where to learn in Arizona.

EAA/VMC Club, through the EAA's global Chapter structure, provides organized "hangar flying" focused on building flying knowledge and skills. The program's network promotes a safety culture through continued education and believes that we develop safety and proficiency through education and real life experience. Monthly meetings offer an opportunity to share in-flight experiences and valuable safety tips. Through the FAA Safety Program, aviation professionals provide informative WINGS presentations. Membership in the EAA/VMC Club is encouraged but not required to participate in this meeting. For more information and to take part in this event, click the link below and register TODAY!

Directions: Park in front of the main terminal building. Entrance to the meeting room is from the outside on the left side of the main terminal door.
