

EAA Chapter 1445 Monthly VMC Club Meeting - All Pilots Welcome

Special Guest Craig Albright will discuss, "How to adjust Final Approach Speed for Aircraft Weight".

As student pilots, our instructors coached us on landing speeds appropriate for the training aircraft. But, landing close to Maximum Gross Weight (MGW) vs. solo with only partial fuel results in different performance. Now that we're pilots and don't have an instructor "whispering" in our ears, how can we safely adjust our landing speed?

The EAA VMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Representative HENRY
ALEXANDER C PENA n/a

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

Bring your EFB, your experience, and your questions, and be ready to participate.

All are welcome. You do not need to be an EAA member to attend

We will also be discussing how you can earn **WINGS** Credit.

Park in front of the main terminal building. Entrance to the meeting room is from the outside on the left side of the main terminal door.

From the ramp, entrance is through the main terminal doors. Meeting room door is on the far right side of the lobby.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
