

Radio Proficiency and the Practical Test

Words mean things! Clear and precise pilot communications with ATC are an essential part of being a safe, professional pilot. The recent rash of runway incursions, near mid-air, traffic conflicts at controlled and uncontrolled airports make it a necessity to be comfortable and proficient with correct phraseology.

This seminar is intended for those preparing for their Private Pilot Practical Test, and also for those CFI's who are providing instruction in this training phase.

From the Main Passenger Terminal Building exit towards the flightline and turn right towards the base of tower. There is a large tree and picnic tables. We will meet at the picnic tables.
