

Loss of Control and the Impossible Turn (Invitation Only)

Loss of Control remains one of the General Aviation Joint Steering Committee's and the National Transportation Safety Board's areas of special emphasis. This 1-1/2 seminar will look at numerous accidents that have occurred within Arizona when the pilot failed to maintain control of the aircraft in the traffic pattern when faced with a critical situation or made a poor aeronautical decision leading to a situation they were not prepared for. We will also look at the "Impossible Turn" the situation a pilot faces when experiencing engine failure immediately after departure and why the turn back to the runway is rarely successful.

From the south AZ 202 (Santan Freeway) take Exit 36, south on Power Road. Turn left on E Ray Road and stay right to turn right on to Sossaman Road. ATP is about 1/3 of mile on the left side of Sossaman Road. The event will be in the south building, classrooms 202 and 203.
