

Aircraft Preflight Tips and Techniques

Have you ever not known the ins and outs of your aircraft or what the purpose of each item on a checklist is? Our event can solve that. It will be a two part meeting where we will discuss the importance of a pre-flight walk-around/checklist, and before takeoff checklist, and also have a group activity/competition with identifying parts of an aircraft and their function. This will help promote a safe aviation environment by providing participants the knowledge on why the checks we do are important, what things are good to look for, and become more familiar with aircraft components.

Hangar O-6. If arriving at/from Airport Terminal, a greeter will be there to provide directions towards the hangars where seminar will be conducted.

A message from the National FAASTeam Manager
