Select #: WP0944695

Lead Representative THOMAS ANTHONY  
PERKOWSKI

The iPad for General Aviation is a jump start guide for pilots and provides a general overview of using the iPad in general aviation. Those who have an iPad will find useful apps and accessories. For those who don't, Tom will provide information on how to purchase an iPad and get the acquisition approved by your spouse! Tom will overview apps for all aspects of GA including pre-flight weather, document management, moving maps and logging flights.

Accessories from mounts and knee boards, to GPS and weather receivers will be covered. Finally, the FAA guidance on iPads will be briefly discussed so you can make an informed decision on using it in your flying.

**Directions:** The Landing Strip is located off Otay Mesa Road (SR905) co located with the Brown Field Administration Building and San Diego Jet Center.

### **A message from the National FAASafety Team Manager**

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
