

San Diego FAAS Team presents:

Mastering the Art of Instrument Navigation

Believing that safety and proficiency are developed through education and experience. Monthly meetings use real world scenarios to engage our members and allow them to share and build their experience.

For the November meeting, we will discuss an actual scenario involving an IFR planned flight from the Oshkosh's area via the Appleton Airport (KATW) to the south east. Please bring your "Electronic Flight Bag" if you have one (ForeFlight, WingX, Go Flight, etc.) loaded with charts from KATW area to the MKG VOR to aid in the discussion of the pilots options. You do not need to be a member or instrument rated to attend.

Directions: For this November meeting only, we are meeting at a Conference Room at 6450 Lusk Blvd. From Mira Mesa Blvd, just east of the 805, head north on Lusk and the building is on the left at the third intersection. Upon entering the building look for a white sign that says Conference Center and IMC Club.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
