

How to Talk on the Radio and not sound like a Doofus!

Everyone starts out as a beginner but there are ways to sound good on the radio and let controllers know you know what you are doing. A couple of Airline Captains will discuss some tricks they've learned over their combined 50-plus years of professional flying. From copying the clearance before taxi, taxiing to the ramp after landing, there are plenty of opportunities to improve your technique and gain confidence on the radio.

These two do a great presentation. You do want to see this one!

Directions: Exit I-15 or SR-163 at Balboa Ave; go west from I-15, east from SR-163 to Ruffin Road, south on Ruffin Road to the first traffic light at Ridgehaven, turn west into the Solar Turbines parking lot.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
