

San Diego FAAS Team presents:

## **Its all about De-Tail**

Ron Blum is an aeronautical engineer, and Chief Engineer for Mooney Aircraft, in Chino, California. His program title is "It's all about De-Tail". Come enjoy a fun, interactive but educational talk learning about what else? Fast airplanes! Did Al Mooney act alone? Did Mooney actually make a fully composite airplane in the late 1940s? Did Mooney design a 300 knot turboprop airplane that went into production? What is Mooney doing in southern California? And the ever-asked question, "Why does Mooney put their tails on backwards?" Ideas that worked and those that didn't. The more we learn the safer we can be.

**Directions:** I-805 South to 905, take 905 East toward Otay Mesa. Take the Britannia exit, turn left onto Britannia, turn left onto Otay Mesa Rd. Turn right at the stoplight at Cactus Rd into Brown Field entrance, turn right onto Continental St. Follow instructions at security gate to call EAA for entrance. Chapter 14 is next to Brown Field control tower.

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
