

CFI Open Forum - System Component Failure

This event will discuss best practices for teaching Airworthiness Awareness in the hope that students will learn how to avoid system/component failure events. We also talk about best practices for systems operation and how to prepare students to deal with an engine failure in flight. This is a forum so your participation is encouraged for success. Flight Instructors, Ground Instructors, Designated Pilot Examiners, Instructors in training or any pilots are welcome and encouraged to attend. Join your flight instructor colleagues and take an active role in improving safety in flight training! Click on the link below and register TODAY!

Directions: The forum will be held in the main ground school classroom #103 at San Diego Flight Training International (SDFTI). Ample parking is available in the front of the building and Fly-In Aircraft may be parked at Gibbs Flying Service across the street.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
