

San Diego FAAS Team presents:

Pacific Coast Flyers Presents - Resolving Medical Certificate Issues

Many pilots are prepared to give up their flying privileges after a heart attack or other medical event. They mostly read stories where things go badly with the FAA and are intimidated by fear of high costs, confusion, and disappointment. Our 3 speakers will provide information and personal stories to show pilots that a renewed medical is obtainable even if you do not have thousands of dollars to spend. We want to help you work smarter, not harder.

Our 3 presenters are:

Jim Lancon: Suffered Angina last summer. No heart attack. A stint was placed into his coronary artery. Jim has submitted paperwork via appropriate channels and is working to get his medical back.

David Modic: Suffered heart attack. Has a stint and has re-established his medical via special issuance.

Greg Dunn: Has suffered several heart attacks. Has just regained his medical via special issuance after several years flying under the LSA rules.

Directions: The meeting will be held at the Palomar Airport Administration Building which is the first structure on the left as you enter the airport property. Please proceed past the building to the main parking lot which is down a short grade on the left.
