

FAA Safety Team and the San Diego Aviation Safety Counselors presents:

Human Factors in Aviation Safety

See instructions below for new security procedures for all attendees.

Join us with Frank Tullo, a 33-year veteran of Continental Airlines. He is a teacher at California State University and Embry-Riddle Aeronautical University. He will speak on the role of pilots in error management. Too often training and performance is evaluated based on pilot errors with a traditional "blame and train" method. But performance and safety can be enhanced by training pilots to detect and correct their own errors; both with professional crews and single pilot operations

There will be time for Q&A after the presentation.

Directions: Exit I-15 or SR-163 at Balboa Ave; go west from I-15, east from SR-163 to Ruffin Road, south on Ruffin Road to the first traffic light at Ridgehaven, turn west into the Solar Turbines parking lot.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
