

San Diego FAAS Team DronePros presents:

Using Manned Aircraft Tools To Aid With Safe sUAS Operations

As an UAS remote pilot and a manned aircraft pilot, Darryl M. Anunciado will share first hand tools, apps, and tips for safe UAS operations in the NAS. Tools like foreflight, radios, and other devices for communication that actual pilots use to stay apart from other airplanes. Darryl and others at Action Drones went beyond sUAS and got their pilots license to take more steps to understand how they can train their clients to make sure they really understand how they to operate their drone safely.

We encourage you to send us any questions you would like answered prior to the webinar:
