

San Diego FAASTeam presents:

Review of VFR Flying Statistics

John will review the 2019 Joseph T Nall Report, as it applied to general aviation, non-commercial flying. Starting out with non-commercial fixed wing, number of accidents and aircraft. Then how many were pilot related or mechanical, pilot certificate, and types of accidents, etc. Then it continues to break down accidents by landing and phase of flight. Then takeoff and climb accidents, fuel management, maneuvering accidents, etc. This should address most of the pilots in attendance, and everyone can benefit from a review like this, especially VFR pilots who don't fly very often.

Directions: Take I-805 South to 905, exit onto 905 East toward Otay Mesa border crossing. Exit from 905 at Britannia, turn left onto Britannia and proceed North to Otay Mesa Road. Turn left onto Otay Mesa Road, turn right at Cactus Road into main entrance to Brown Field. Turn right to follow Continental Street past the old (closed) control tower and The Landing Strip restaurant/bar to the East access gate. Follow instructions on the access pedestal to call EAA Chapter 14 for access. Proceed to EAA Chapter 14, immediately East of the active control tower. Meetings are held in the first hangar closest to the runway.

Prior to attending a safety seminar, please review and abide by current CDC, State and Local health guidelines.
