**Lead Representative LAWRENCE
JOSEPH GODFREY n/a**

This is an audience participation event. After a brief Audio/Video presentation we ask "What Would You Do"? Everyone is encouraged to join in the discussion. Videos depicting actual flights that encountered challenges are chosen from a library provided by EAA. In the ensuing discussion, often there's agreement on the steps to take.

Sometimes we argue it out - respectfully - and modify our plan of attack. The benefit is to think it through without the pressure of flying the plane. Pilots of all skill levels are encouraged to attend.

February's scenarios are both during approaches as you approach the FAF. One is from Florida and the other is from New England. One is a terrain warning from the GPS as you descend to you or assigned altitude. The other happens frequently - you're cleared to a fix and as soon as you punch the Direct button ATC issues a hold at a fix which you just wiped from your sequence.

Click the link below for more information and to register TODAY.

Driving: Take I-5 to Palomar Airport Road. Go East 3 miles to the airport entrance. Administration building is the first building on the left as you enter the airport. Parking lot is the first left at the stop sign after you pass the administration building.

Flying: Park at transient parking or Western Flight. The administration building is a short walk to the South.
