

Getting a Good Aircraft Checkout

Our speaker, John Mahany, will discuss what's involved in getting a good aircraft checkout.

There are many things to consider now, depending on the aircraft, and how its' equipped. The goal is, what's required to get a good, thorough check out, from an experienced and knowledgeable CFI, in a different make and model aircraft than what you have flown before, so that you will be a good, safe, competent pilot.

EAA Chapter 14 is located at the East side of Brown Field (SDM) immediately to the East of the active control tower. Enter through Gate#4, turn left and follow the dirt road through the construction area past the tower to Chapter 14, we meet in the hangar closest to the runway. Call Chapter 14 from the access pedestal to open the gate, number is posted on the pedestal.

A message from the National FAASTeam Manager
