

Mountain Flying for Helicopter and GA Aircraft

This Safety meeting will cover the operation of aircraft, both fixed and rotor wing, in a mountain environment. Topics covered will include performance at altitude, weather related issues, and safe operating practices. Anyone wishing to operate in the Truckee/South Lake Tahoe region should consider attending.

Directions: The City Council Chambers are located inside the main terminal at the South Lake Tahoe Airport. Enter through the main entrance and the meeting room is to the right.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
