

FAASTeam presents:

Aviation Survival Course

Will you be prepared to survive a forced or emergency landing? Every pilot knows that flying requires preparation. The need for a thorough flight plan could not be greater than for a trip into mountainous terrain or remote areas like Nevada. The scarcity of roads and facilities, the rough terrain, and vast distances between communities demand forethought and planning. Emergency Survival Gear and the knowledge of how to use that gear is essential.

Course Outline:

The Survival Triangle

- Awareness
- Mental Elements
- Elements

Initial Assessment:

Cold Injuries

- Quick guide to Anatomy and Physiology
- Hypothermia
- Immersion Hypothermia
