

Seminar Series

Staying Found:

Rescue Communications For Aviators & Backcountry Adventurers

Howard Donner joins us to help increase your odds of being rescued in the event of an off-airport landing or backcountry emergency. This presentation will cover essential survival communication methods, ranging from basic signaling strategies to the most advanced satellite systems. We'll dive into what really works while focusing on the strengths and limitations of modern rescue tools like Garmin inReach devices, PLB's, ELT's and more. Join your fellow adventurers live or via Zoom for this Fly Safe event.

About The Speaker

Howard Donner is a seasoned professional with a diverse background in high-altitude and expedition medicine. A former NASA Medical Operations Consultant, he is an author, SAR advisor and CFI teaching largely out of Truckee. Howard can often be found teaching post-crash survival for the "Finer Points of Flying" National Adventure Flying Trips.
