

FAASTeam presents:

**Secrets Only (REAL!) Pilots Know About Airports + another  
chance to experience the 'Vertigo' Chair!**

Pilot Deviations: not only tough on your certificate, but dangerous and potentially lethal. We'll offer tips on avoiding the hazards that put HNL International at the TOP of the US list for airport deviations in 2014! "Secrets Only Pilot's Know About Airports" -- Do you know how to visually identify runway length, width and what approaches are available right from your cockpit window...? This briefing offers pilots of any skill level unique perspectives about the little known world of airport facilities such as NAVAIDs, pavement markings as well as airfield signing, lighting and communication and much, much more. Learn the secrets that only experienced pilots know; and become a safer and more informed pilot! We will also feature demonstrations in the Barany ("Vertigo") Chair for anyone who may have missed the opportunity at our Loss of Control Seminar.

**Directions:** Go up the stairs...

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
