

## Transitioning to Turbine Aircraft 1 - Engines/Powerplants

This is a repeat presentation of a free course intended for piston aircraft pilots interested in gaining a foundational knowledge of turbine aircraft engines, either in anticipation of flying them in the future or just for continued education. This class will focus on engines/powerplants, with future classes focusing on other topics. **It is being offered for those who were not able to attend the class in June. If you already attended, please do not sign up again as the content will be the same.**

Seating is limited to 15 people to ensure a high level of instructor and attendee interaction. Walk-ins will not be accepted, so if you register and then are unable to attend, please withdraw your registration so someone else may attend. This course will be held again in the future, so if you are unable to attend this time, watch for future notices.

Pacific Flight Academy classroom.
