

FAASTeam presents:

IFR Round table: Visual Segments on Instrument Approaches

This event is part of our IFR Roundtable series of discussion groups, where advanced and novice IFR pilots share knowledge about particular aspects of instrument flight. Held every 6-8 weeks, we focus on one small IFR procedure or topic area and spend a couple of hours talking through challenges, definitions, techniques, and safety issues in that topic area.

This session topic: Visual Segments on Instrument Approaches. Some instrument approaches end with a "fly visual to airport" segment, i.e., South Lake Tahoe, CA and Juneau, AK. This session will review the special considerations for pilots when flying such approaches and how they are charted.

We will look at some prominent approaches that include "fly visual" segments and point out their unique aspects.

Presenter Brian Eliot is a flight instructor and regular safety seminar speaker at San Carlos Flight Center. His safety seminars are usually very well attended, so please plan to arrive early. For more information, call the Flight Center at (650) 946-1700 or email Brian at <mailto:brian@sancarlosflight.com>.

Event Details

Sat, Aug 11, 2012 - 12:30 pm

San Carlos Flight Center

655 Skyway Road

Suite 215

San Carlos, CA 94070

Contact: San Carlos Flight Center
(650) 946-1700

info@sancarlosflight.com

Select #: WP1545559

Representative DAN KELLY DYER
