Representative DICK CHANG

Closer examination of landings reveal that a great number of the problems are entirely preventable, but often poorly understood. In this seminar you will learn: Why most pilots are approaching at the wrong airspeed without knowing it; Why that old rule of 'power for airspeed, pitch for' is making your life miserable; The visual cues that tell you what inputs you need to make; When 'cross-controlling' is a good thing;

Directions: Hwy 101, exit San Martin Ave, go west one short block, (from 101 south bound, a very short block) to Murphy Ave, south on Murphy, around the west of E16, look for a sign of the Museum. Overflow parking on Murphy Ave.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
