

FAASTeam presents:

Understanding Search and Rescue (and the CivilAir Patrol)

With good flight planning, good decision making, and a little luck, you'll likely never directly experience the value of a Search and Rescue operation. But that doesn't mean we all aren't very glad that the teams are there should the need arise. Join David Hartman and Captain Coby Sena of the California Civil Air Patrol for an introduction to the Search and Rescue process.

Find out who organizes the response, what triggers a Search and Rescue mission, and what the pilot crews of the California Civil Air Patrol do to prepare for these missions. As a pilot, how can you become involved in the CAP? How can you offer your services? What should every pilot know about how to handle the situation from the ground in the event of a forced landing or accident? Members of a local Civil Air Patrol squadron will present this informative seminar, answering your questions about search and rescue missions. For more information about this, or any of our weekly Safety Seminars, please visit <http://sancarlosflightcenter.com/scfc-events/>.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.
