

FAAS Team presents:

Capturing the Wonder - Aerial Photography for Beginners

Flying affords us a spectacular view of both earth and sky. Eye-dazzling vistas of mountains, plains, rivers, and ocean shorelines as seen from above.

And only pilots can truly understand the wonder and power of clouds, seen as peers from the air.

Now if it was just easier to capture these beautiful sites using a camera... Amateur photography enthusiasts and private pilots Alexander Cooper and Benjamin Thomas will lead the group discussion on the challenges and techniques for making aerial photography work. Things like lighting, camera angle, shutter speed, flash, etc.

Additionally, it's important to remember that safety comes first, so CFIs will be on hand to reinforce safe flight practices for aerial photography. It will be an interesting and educational discussion. We hope you will attend. For more information about this, or any of our weekly Safety Seminars, please visit <http://sancarlosflightcenter.com/scfc-events/>.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
