

No Way! It Can't Be This Easy! VOR Navigation for Dummies

Here are a few topics from this interesting and useful safety seminar: * Quickly and easily determine your position around the VOR, even with the needle pegged * How to calculate reciprocal headings—instantly—without doing any math * How to quickly and easily compensate for crosswinds—without having to think about it * And, if you are an IFR pilot (or expect to be), do all of the above while *partial-panel*! Come on down. You will never be lost again!

Directions: On 680 exit onto Capital Expressway - travel SE on Capital. At Cunningham Ave (3rd light) turn R. Trade Winds is ahead on your Right.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
