

FAAS**T**eam presents:

G1000 Weather

Learning the G1000 includes developing a working understanding of all the functionality buried in the MFD page groups. For aircraft equipped with a satellite weather data link, the Weather Data Link page in the Map page group provides you access to a rich wealth of information. But do you understand it?

Your job is to know how to get the weather information you need, without spending too much time with your eyes inside the cockpit. The best way to learn G1000 is to spend quality time ON THE GROUND learning about the features available.

In this WINGS safety seminar, we will walk carefully through each feature of the G1000 Weather Data Link page, one at a time, to allow a better understand each weather feature and the benefits and limitations it brings to improving the safety of our flight. One important point in the discussion will be learning how not to get yourself in trouble, by reading more accuracy from the displays than they actually provide. Understanding weather is important. Understanding when not to trust outdated or vague weather information is just as important.

Event Details

Wed, Feb 13, 2013 - 7:00 pm

San Carlos Flight Center

655 Skyway Rd

Suite 215

San Carlos, CA 94070

**Contact: San Carlos Flight Center
(650) 946-1700**
