

FAASTeam presents:

Celebrating the Cessna 152: Honoring the Traditional Lightweight Trainer

For decades, the Cessna 152 has been workhorse in flight training. Many pilots still love the trusty C152 as a fun, responsive, and economical choice for many flight missions. If you haven't taken a spin in a C152, what are you waiting for?

Presenter Justin Phillipson shares his knowledge and experience gained in over 2,500 hours of instructing in C152s. He will share important information you need to know before getting your aircraft checkout. Topics include how the C152 is different from the more common C172, the importance of weight & balance in lightweight aircraft, carbureted engine operations, as well as give examples of ideal missions for the C152. Not to mention how fun it is to fly!

As with any aircraft, the safest way to add a new make and model to your personal skill base is a thorough understanding of the POH, with special attention to the things that make that aircraft different from the ones you already understand. Join us and learn how to safely operate this lightweight trainer. San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and
