

FAAS Team presents:

Radio Communication Requirements: An ATC Perspective

Pilots hear a wide variety of communication styles on the radio. We develop their own styles based on what we are taught, what we read, and what we hear. Do you know what air traffic controllers really want to hear?

San Carlos Flight Center is pleased to welcome Raul Suarez, Air Traffic Control Tower Manager at San Carlos Airport. Raul will lead an interactive discussion about the best ways to make your radio communications more concise, precise, and effective. The air traffic control frequencies in the Bay Area are as congested as the airspace, and Raul's tips will help us work together to clean up the channels.

San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our weekly seminars, please visit <http://sancarlosflight.com/activities-and-events>.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.

Event Details

Wed, May 29, 2013 - 7:00 pm

San Carlos Flight Center

655 Skyway Rd

Suite 215

San Carlos, CA 94070
