

## Mountain Flying Safely

Now that we are in the middle of the summer months, more pilots are venturing into the mountains. Flying in the mountains can be quite spectacular. There are numerous unique aspects about flying in the mountains that pilots need to be aware of in order to do so safely. The seminar will cover topics such as aircraft performance, density altitude, weather and many more.

**Directions:** On Hwy 680 exit onto Capital Expressway. Travel SE on Capital. At Cunningham Ave (3rd light) turn Right. Trade Winds Aviation is ahead on the Right, the Terminal Building to the Left.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
