

FAAS**T**eam presents:

Intro to Aerobatics

Watching aerobatics can be awe inspiring. Seems like only a pilot could truly appreciate how much skill and training goes into a single aerobatic maneuver – let alone an entire sequence like we often see at air shows. Aerobatics done right means demonstrating a deep mastery of the aircraft. Aerobatic pilots have to know just how far they can take any maneuver to maintain the energy required for flight and to stay within the load limits of the aircraft structure.

Have you ever thought about aerobatic training for yourself? Did you know it is available right here in the Bay Area? From spin training appropriate for every pilot, up to advanced aerobatic maneuvers, this could be your next pilot skills growth area.

This seminar will introduce pilots to the Safe Aerobatics Program at San Carlos Flight Center. Our tailwheel and aerobatics instructors will describe our Safe Aerobatics training curriculum, including the various maneuvers that are taught and Flight Center currency requirements. Find out how aerobatic training can help you improve your understanding of basic aerodynamics and become more connected to your airplane. Imagine how cool you'll look walking to your
