

FAASTeam Western Pacific presents:

Meet the Mechanic: Engine Management for Pilots

Part of our Meet the Mechanic series of discussion groups, where experienced aircraft mechanics share knowledge and expertise with the general aviation community. Here is your chance to get answers to all those burning questions you have about how to treat your engine better! Kamal Singh of Suburban Air will join us for a lively and interactive seminar designed to help pilots become more informed and more competent about operating aircraft engines. The discussion will include:

- leaning the engine: how, when and why
- engine temperature management
- various engine start procedures (hot/cold/flooded starts)
- the importance of adequate oil levels and oil monitoring in flight
- detection and diagnosis of the most common in-flight engine abnormalities

The session will have an extended Q&A period, so bring those common and uncommon questions regarding engine management. We may not be able to answer everything, especially if it's very make/model specific, but we can address the most important things common across all aircraft. Kamalpreet Singh is A&P IA at Suburban Air Corp. at Hayward Executive Airport, and has been working as an aircraft mechanic in the East

Event Details

Sat, Oct 26, 2013 - 12:00 pm

San Carlos Flight Center

655 Skyway Rd

Suite 215

San Carlos, CA 94070

Select #: WP1552174

Representative DAN KELLY DYER

Bay for 8 years. He is a specialist at engine work and enjoys the challenge of the work so much it often doesn't seem like work. Kamal is also a student pilot, and is currently restoring a Piper Cherokee Warrior PA28-151 while he works on his pilot certificate. San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our weekly seminars, please visit <http://sancarlosflight.com/activities-and-events>.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
