

FAASTeam presents:

An Introduction to iPads in the Cockpit

iPads are invading the cockpit! Is this a good thing or a distraction? The power and flexibility of the iPad make it the ideal electronic flight deck. Presenter Bob Leuten will discuss how his iPad and ForeFlight have changed his personal approach to flying. Some of us have already experienced the ease of electronic charts over paper charts. On a multi-state journey, it's hard to beat the ability to zoom and scan rapidly. And it can be a lot lighter to take an iPad than several A/FDs, E6Bs, charts, and approach plate catalogs. This seminar will cover some of the uses of the iPad as an electronic flight deck. Pilots are invited to participate by contacting the speaker in advance to describe what application they would like to share with the group. A projector with an iPad connector will be available to share the iPad's screen with the group at large. Flight planning, navigation, weather, airport information, and instrument procedures. Which uses are a good idea, and which can get you into trouble? Join us for a lively discussion of the latest in iPad applications and technology. Presenter Bob Leuten has been a flight instructor since 1970. He retired from his full time job in aircraft insurance in 2007, allowing him to dedicate even more of his time to flying. He has more than 5,800 hours in tailwheel and
