

FAASTeam presents:

ForeFlight Tips and Tricks

The ForeFlight app for iPad and iPhone is quickly becoming many pilots' favorite electronic flight planning tool. If you're already familiar with it, you know what a great job it does with flight planning, and organizing charts and approach plates. You know how useful the real-time radar, satellite, fuel prices, TFRs, winds and weather reports are for your cross country flights. Imagine all the cool things it does that you haven't yet learned. Whether you're new to ForeFlight or consider yourself a savvy user, plan to join us for this interactive and engaging presentation to learn some new tips, tricks, and cool things you can do with the app. Presenter Kate Thomas is a private pilot who recently finished her freshman year at Rice University, during which time she worked as a sales and marketing analyst at ForeFlight. Kate will share some of the great tricks she learned working one-on-one with the CEO and other ForeFlight staffers. Co-presenter Mark Rymill is an instrument rated private pilot, aircraft owner, and software professional in the Bay Area. San Carlos Flight Center was voted Best Flight School in the US in the 2013 AOPA Flight Training Excellence Awards. We are committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our
