

## Safe Mountain Flying in the Sierras

You've probably heard that flight in the mountains is very different than it is "down in the flats." We will talk about what it takes to fly safely in the Sierra Nevadas and Lake Tahoe. Mountain Flying topics will include weather planning, spatial disorientation, and cold weather operations. Understand what you can and can't do in a single engine Cessna or Piper, and even more importantly: WHY!

**Directions:** The WVFC San Carlos location is in the 655 Skyway Road building, Suite 101.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
