

Loss of Control in Maneuvering Flight

The NTSB has identified Loss of Control in maneuvering flight as a major cause of fatal accidents in General Aviation. They estimate 40% of fatal accidents can be attributed to loss of control. CFI and FAASTeam Representative Bruno MARTIN will conduct a refresher on teaching and educating pilots on how to recognize Stalls and Spins and situations to avoid incurring an inadvertent spin at low altitudes.

Directions: From HWY 1 Exit on Airport Blvd and head North on Airport Blvd. Make a left Turn on Aviation Way (0.7Mi from HWY 1) and destination will be on the airport side.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
