

FAASTeam presents:

# Mountain Flying Seminar

Flying in the mountains is some of the most amazingly beautiful and satisfying flying you may ever accomplish. But it comes with increased risk and responsibility. Every day, GA pilots who fly in the mountains safely calculate and plan for such risks, and you can too. Join the CFIs of San Carlos Flight Center for an overview of elements of mountain flying. We'll look at how terrain and mountain weather patterns affect one another and what that means to small airplanes. We'll discuss density altitude in terms of how to calculate it and what it means for landing and departing at high-altitude mountain airports. And no mountain flying discussion is complete without emergency preparedness and survival gear. This seminar also serves as a pre-trip briefing for the big multi-plane Colorado Mountain Flying trip in July being organized by the Bay Area FlyOutGroup (FOG). We will use the routing of that trip to highlight the talk, but this session is open to non-participating pilots who wish to obtain the ground instruction related to a mountain checkout. San Carlos Flight Center was voted Best Flight School in the US in the 2013 AOPA Flight Training Excellence Awards. We are committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our

## Event Details

**Sun, Jun 28, 2015 - 12:00 PDT**

**San Carlos Flight Center**

655 Skyway Road

Suite 215

San Carlos, CA 94070

**Contact: San Carlos Flight Center  
(650) 946-1700**
