

Approach Plate Lunch: IFR to Stockton

Why would a pilot from the Bay Area make the journey to Stockton during late summer? Is it for the 90+ degree temperatures? Is it the availability of fresh produce from the California Central Valley? No! It's because Stockton offers the perfect combination of instrument approaches and ATC coverage for instrument pilots looking for instrument currency, or for student pilots who want to shoot a variety of instrument approaches without a lot of wasted time in between going from airport to airport.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner. Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
