

FAASTeam presents:

Surviving L.A. Airspace

If you have considered flying yourself to Los Angeles, you may have felt a bit intimidated when you first looked over the Los Angeles Sectional and TAC charts. What is the best way to navigate through this airspace? It is even more complicated than our home airspace on the San Francisco TAC!

SCFC Flight Instructor Miguel Mundo presents an interactive and engaging analysis of the maze of airways, overlapping airspace, and suggested VFR flyways that make up the Los Angeles terminal area. He will discuss various arrival and departure routes so that you can safely and confidently arrive at your destination. This type of ground briefing is a must for anyone planning to make a trip into the Los Angeles area.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
