Representative DAN KELLY DYER

As iPads make themselves more useful in the cockpit, pilots have a broad choice of which app to use. In this ever changing app marketplace, it's worth staying up to date on what is available. If you are just starting with your iPad for aviation, or if you're just looking to find out about another application to choose from, join us for this presentation.

Reid Raisanen is a CFI at San Carlos Flight Center, and he uses FltPlan Go as his electronic flight bag (EFB). We've invited him to share with our pilot group the basics of how he uses FltPlan Go for his VFR and IFR flying. He will also review some of the app's limitations. Feel free to bring your iPad and join along in the presentation.

**Directions:** Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
