

FAASTeam presents:

Considering an Instrument Rating?

Time for IFR?

Imagine this scenario. It's Sunday morning and you're at Santa Maria airport, eager to start the VFR trip home to the Bay Area after a fun weekend of wine-tasting. The skies are overcast at 800 with tops reported at 1,100. That thin cloud layer persists, anchoring you to the surface tighter than a tie-down chain. If you could file IFR, you'd be free to launch for a relaxed ride home. But there you sit, uncertain about when or if the layer will burn off.

Whether you're a student pilot, a new private pilot, or you've been flying for a while – you have probably considered getting an instrument rating. Is it time to get started? How much time will it take? What will it cost? How valuable is an instrument rating to a pilot that isn't flying wild Alaska?

Great questions. In this seminar, SCFC CFIs and pilots will lead a group discussion on the pros, cons, challenges and benefits involved in earning your instrument rating. We'll discuss the various paths private pilots take toward earning their instrument rating, and the factors involved in making the decision to start the process.

Any questions, contact us at (650) 946-1700 or info@sancarlosflight.com.

promoting safety in general aviation through our evening safety seminar programs. Space is often limited so it is important to sign up early through the FAA event notification system at FAASAFETY.GOV. SCFC members may choose to watch the seminar live over the web at home. Contact your SCFC member service rep at (650) 946-1700 to confirm secure online access to any particular seminar.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASafety Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
