

FAASTeam presents:

Drone Operations- Regulatory Changes

New rules for Drones? Yes, there are new rules regarding drones. We aren't in Kansas anymore. In this safety seminar we will cover the changes to drone operations brought about by recent regulations. Learn about the new 14 CFR Part 107 rules that regulate drone operations.

Want to know what changed?

What it takes to obtain a remote pilot certificate with a small UAS rating?

How about what is in the recent Airmen Certification Standard on Small Unmanned Aircraft Systems (sUAS)?

How is privacy being addressed for drone operations?

We will cover these key topics and current regulations without droning on about mundane details.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
