

FAASTeam presents:

Meet the Meteorologist

In today's information age, the opportunity to speak with a local meteorologist have gone by the wayside. Today's plethora of weather tools on the web have really steam-lined gathering weather and preflight information. But talk to the seasoned pilot of not so long ago and they will be the first to tell you how wonderful and valuable it was to chat with a meteorologist at the local flight service station to get a good feel of the weather and it's current trends before your flight.

San Carlos Flight Center is proud to have Ashley Helmteg, meteorologist with the Center Weather Service Unit at Oakland Center and Rick Canepa, meteorologist with National Weather Service, speak to us on West Coast Weather Hazards in VFR/IFR Flight and Clouds, Fog and Aviation. To hear these speakers talk is truly a luxury, a pilot will not want to miss.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
